

## FOR YOUR INFORMATION & ENGAGEMENT

On Sunday, November 22nd @ 4pm  
Acts On Stage Theater Company will premiere a theatrically staged  
online interactive broadcast of their first staged production

# "12 Angry Men"

featuring (for the first time ever anywhere) an all Black Male cast!

This iconic courtroom drama takes audiences on a winding journey between the guilt or innocence of not just the defendant but of the **American justice system** itself. In a black and white society, we're forced to consider **what truth lies within** the gray areas of our hearts.

Acts On Stage is committed to using its work to **elevate the arts and bring attention to matters that matter like racial equity, social justice and positive urban community engagement**. This production allows us to bring awareness, attention, and action to matters of social justice, community development, Black maleness and responsible civic engagement while utilizing the brilliance and beauty of the arts and theater. Now, more than ever it is imperative that creativity creates change and that we inspire audiences to move from media consumption to the engagement of **#ArtsAsActivism!**

We invite your organization to use this tool to generate or continue conversation.

All of us are living in a dually-dynamic moment of response to a global pandemic and the resurgence of racial unrest in America. While the pandemic requires us to stay **SAFE**, the resurgence insists that we can not be **SILENT**.
